Technology Consultant (Strategy & Advisory)

THE COMPANY

This Management Consulting & Technology Advisory firm employs over 5000 staff in 80+ office locations around the globe.

Their Technology Consulting Practice works with Enterprise clients to become trusted advisors and help them design and implement their IT strategies and digital transformation initiatives that achieve business objectives.

Benefits include:

- Established, stable, and secure US-listed firm who have the resources of a large corporate yet the feel of a boutique.
- A non-political environment where you have control over your own career and are given merit-based promotions.
- Varied and interesting engagements working on highly recognizable Enterprise clients.
- Extensive professional development and training opportunities.
- International travel opportunities if desired.
- Direct access to (and mentorship by) highly experienced and talented senior leaders in the firm.
- Fair and transparent incentive compensation plan to reward your personal contributions.
- Flexible work from home options.
- Several newly created roles available to due growth in the Practice - from Manager, Senior Manager, and Associate Director levels.

THE ROLE

Newly created role sitting within the Cloud & Infrastructure Advisory team who work with Enterprise clients looking to adopt, improve and/or transform their IT and Cloud Infrastructure.

As a Technology Consultant, you will work with CIO's, IT Leaders, and C-Suite Executives to advise them on the best way to design and implement IT strategies that will meet business goals.

Key elements of the role include:

- Defining innovative technology strategies / solutions (Cloud & IT Infrastructure- public, private and hybrid environments).
- Creating right fit Operating Models; Architecture Plans, and IT Road Maps.

- Solution advisory & assessment.
- Improving operational performance (IT Operations and Infrastructure).
- Understanding and managing technology risks.
- Clarifying cost of change and improving efficiencies.
- Staff supervision and development of new & existing business opportunities.

Additional responsibilities include:

- Manage client engagements, both individually and a team (drafting proposals, running the engagements, risk assessments, budgeting, client reporting etc).
- Facilitate client workshops and discovery sessions.
- Provide advisory and expertise on Cloud & Infrastructure architecture, hardware, frameworks, standards, and technology.
- Advise and consult with clients to uncover requirements/business objectives, set expectations, and ensure objectives are met.
- Business development.
- Developing, training, and overseeing junior staff members.

A SUITABLE CANDIDATE?

Suitable for a client-facing Technology Consultant with a management consulting background in Technology strategy & advisory.

It is ideal for a motivated and hardworking self-starter with a positive attitude who wants to join a rapidly growing Cloud Advisory Practice.

The following is required:

- Technology advisory & strategy consulting experience within Big 4 (or similar) management consulting environments (e.g. Manager, Senior Manager, Associate Director etc).
- Cloud and/or IT Infrastructure background/knowledge/experience is highly beneficial.
- IT Risk management background.
- Professional presentation, clear communication skills, and an ability to facilitate client workshops.
- Display a genuine interest to grow and expand your knowledge in Cloud.
- Relevant Bachelors Degree and/or IT certifications.
- Staff management and business development experience.

This is a full-time permanent role located in the Sydney CBD and is offering \$130,000 - \$200,000 (including super & incentives) - depending on experience.

****Please note, full permanent Australian working rights are required to be considered for this position and successful applicants will be contacted.***
